Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, and 9 are rejected under 35 U.S.C. 102(b) as being unpatentable by Breed et al (US 6,736,231).

Regarding claims 1 and 10, Breed discloses a vehicular motion detection system using radar comprising a detector for detecting at least infrared radiation (see col.4, lines 55-66) and a filter element adapted such that substantially only infrared radiation is detectable by the sensor element. See figures 1-16, col.12, lines 56-67 to col.30, lines 1-60.

Regarding claims 2 and 11, Breed discloses a device is for automatically switching lighting equipment for a motor vehicle. See figure 16, col.28, lines 65-67 to col.29, lines 1-52.

Regarding claims 3 and 12, Breed discloses wherein the sensor element emits a signal, and further comprising a control device (processor) including an element for switching the lighting equipment as a function of the signal. See figure 16.

Regarding claims 4, 13, Breed discloses wherein the filter element is attachable to a glass pane of the motor vehicle. See figures 1-16.

Art Unit: 2821

Regarding claims 9 and 18, Breed discloses wherein the filter element is integrated into the sensor element. See figures 1-16.

Allowable Subject Matter

2. Claims 5-8 and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach that, a rain sensor including a light-conducting element, the light-conducting element being substantially only transparent with respect to infrared radiation and being used as a filter element recited in dependent claims 5 and 14.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Williams (US 3, 870, 884) and Neilson et al (US 2002/0098592) are cited to show an infrared detector device.
